

MA 374 Lab 01

NAME : SAHIL KUMAR GUPTA

ROLL NUMBER : 200123081

1. Tabulation of option prices for different subintervals

Call Price	
Step Size	Option Price

1	12.7881
5	10.543
10	9.56541
20	9.75852
50	9.86016
100	9.88602
200	9.89397
400	9.89443

Put Price	
Step Size	Option Price

1	33.9091
5	31.664
10	30.6864
20	30.8795
50	30.9812
100	31.007
200	31.015
400	31.0154

2. Comparison of option prices at $t = 0$ for various values of M

1. call option in step of 5

2. Call option in step of 1

3. Put option in step of 5

4. Put option in step of 1

Convergence : The Call Option pricing plot shows that the initial call option price converges to 9.894 and initial put option price converges to 31.015.

3. Values of call option at different times:

[illegible]

Values of put option at different times:

Time Step	Put Price	Option Price
-----------	-----------	--------------

```
